---

## Condoms Internal

(used in vagina or anus)

How does it work?

---

---

---

What is the efficacy (% how effective )?

---

How long does it last?

---

Where can someone get it?

---

How much does it cost? (This may include prescription and a medical procedure)

---

Pros:

---

---

---

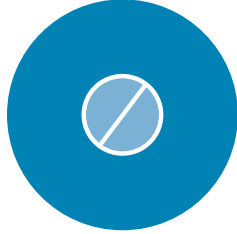

Cons:

---

---

---

# Contraception matching

## Emergency Contraception

(sometimes called morning after pill)

How does it work?

---

---

---

What is the efficacy (% how effective )?

---

How long does it last?

---

Where can someone get it?

---

How much does it cost? (This may include prescription and a medical procedure)

---

Pros:

---

---

---

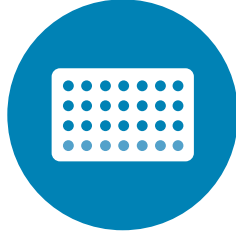

Cons:

---

---

---

# Contraception matching

## Contraceptive Pill

How does it work?

---

---

---

What is the efficacy (% how effective )?

---

How long does it last?

---

Where can someone get it?

---

How much does it cost? (This may include prescription and a medical procedure)

---

Pros:

---

---

---

Cons:

---

---

---

# Contraception matching

## Withdrawal

(removing penis from vagina before ejaculation)

How does it work?

---

---

---

What is the efficacy (% how effective )?

---

How long does it last?

---

Where can someone get it?

---

How much does it cost? (This may include prescription and a medical procedure)

---

Pros:

---

---

---

Cons:

---

---

---

## Calendar Method / rhythm method

(using information about the woman's menstrual cycle to decide fertility)

How does it work?

---

---

---

What is the efficacy (% how effective )?

---

How long does it last?

---

Where can someone get it?

---

How much does it cost? (This may include prescription and a medical procedure)

---

Pros:

---

---

---

Cons:

---

---

---
